

Robots

Design your own robot. How many different shapes can you use for the buttons and lights?

Use a box to make a robot costume. You could cover it with foil and stick on buttons etc.

A robot needs electricity to work. What else in your home uses electricity? Draw a picture of all the things that need electricity.

Imagine you had a robot that would do anything you wanted. What would you ask it to do?

Collect a few magnetic objects. Observe what happens when you put them together. Talk about what is happening.
